Hi Cheryl,

I have heard there is a report for Central Sands Dairy and I am wondering if you can send it to me. I am interested in samples collected upgradient of land application field RDO-12. I have quarterly sample analytical results collected April 15, 2018, downgradient of RDO-12 (and upgradient of the production site). I am attaching the most recent report for production site monitoring. Please see Figure 1 for monitoring well locations. RDO-12 is adjacent to and north of the production site. Under our settlement agreement with the dairy, they are only growing alfalfa. Monitoring wells CSD-4 and CSD-8 are upgradient of the production site, downgradient of RDO-12. CSD-3S and 3D are considered upgradient background wells for the production site and are not considered to be downgradient of RDO-12.

Thanks,

Laura
